

Science Math Master

Science-Math-Master (SM²) provides professional development to teachers, upgrading their skills in Biology and Geometry and boosting the performance of high school students who must master biology and geometry to succeed in school and beyond. In partnership with the Florida Department of Education, The University of Tampa is developing and delivering classroom sessions and an on-line system for teachers statewide.

Join us for a One-Day Biology Spring Workshop:

What's New?

- Come hear the latest updates on the Biology EOC and the national Next Generation Science Standards. What will this mean for teachers and students?
 - Which standards do students struggle with? How can we address this?

Participate!

- An interactive demonstration of effective tactics and techniques that address the Biology Next Generation Sunshine State Standards
- Exploration of the human immune system using a ready-to-use model lesson and collaborative learning

Five locations to choose from:

Biology Session: 1 PM—4PM

\$100 Stipend Provided for Attending
(registration limited to one workshop per person)

2/8/14	St. Augustine
3/1/14	Gainesville
